

This is in respect to BPL. I, along with many others in the Huntsville area hope that you will not allow the implementation of BPL to go forward. I think by now you Guys have heard plenty of why this will be a step backwards for all the Amateur Folks anywhere BPL is allowed to exist. Also, if any of the people that ultimately will have the duty to say yes or no to the outcome are in fact Amateur Radio people, you know more than others that are not radio people what will happen. So, please, don't allow this thing to ruin one of the finest and most helpful hobbies that has ever been. Most of us have had no easy time to get HF privileges, so we too can become useful to our respective neighborhoods, in the event of natural or manmade disaster. If we can't hear to communicate, we're no good to anyone. This is seen by most, as a serious threat to at least one aspect of homeland security. Thanks in advance your help for the Ham Folks around the Country if not the World.

Best Regards,

Charlie Emerson Huntsville, Alabama (N4OKL)
